

## ARRIVALS IN NICE CÔTE D'AZUR AIRPORT

Most arrivals in Nice are made on RWY 04L (about 90%) and for 55% of the time using the VOR DME circle to land RIVIERA 04L procedure. The ILS 04L and VOR DME circle to land SALEYA 22R procedures are operational for about 35% and 10% of the time respectively.

Landings, under normal operating conditions, are made on the North runway (04L, 22R). This runway is 2570m long and both landing and take-offs can be made with up to a 6kts tail wind component.
